

8sole

Simple.
Stunning.
Efficient.

The future is happening today

Improve your business. 8sole is the end-to-end solution for medical specialists. Design the most advanced custom foot orthotics in just a few clicks and receive them within 2 weeks.

Why 8sole?

Fast and clean process

Forget messy plaster. 3D scanning saves you time.

Competitive advantage

A unique design for improved biomechanics.

Stronger revenues

Your patients will be happy to refer you.

Very low investment

The app is free! Pay only for the orthotics.

reddot design award
winner 2019

Truly custom in minutes

The 8sole configurator is a revolutionary, interactive app allowing you to effortlessly design truly custom foot orthotics. Choose from your frequently used presets to make the process blazing fast.

3D Scan.

Configure.

Receive.

Fit.

Focused on biomechanics

8sole uses a complex algorithm to design each patient's orthotics with optimal biomechanics. It is adjusted to your patients' feet and lifestyle with unique custom ribbing and controlled thickness.

Offer 8sole

Offer your patients the most advanced custom 3D printed foot orthotics. With 8sole, you gain a significant competitive advantage, save time, and improve patient satisfaction.
